BANE'S

HIGHLY SATISFACTORY.

Showing Made by the New Battleship Connecticut.

Rockland, Me., Aug. 8.—In fourteen runs over a measured mile course outside of the harbor the first-class battleship Connecticut, the first of the class built by the government, made a showing which was highly satisfactory to Rear Admiral Robley D. Evans and the trial board. The average speed of the best five runs was 18.73 knots.

The trial was marred by a fatal accident. L. M. Turner, a fireman of the first class, who was borrowed from the battleship Ohio for the test, was killed by a bucket of ashes falling on him. The bucket, which weighed about 200 pounds, fell while being hoisted from the fire room, striking Turner on the head. He died an hour later.

TWO GIRLS DROWNED.

Caught in Quicksand in the Chippewa River Near Glidden, Wis.

Glidden, Wis., Aug. 8.—Martha Weldenhost and Ella Jensen, both about twelve years old, were drowned in the Chippewa river near Glidden.

The two girls, who were cousins, were wading in the river with five companions when they all reached a spot where there was a bottom of treacherous quicksand from which they were unable to extricate themselves. One of the girls in the party who was somewhat older managed to rescue four of the others, but the two sank before she could reach them.

Four Anarchists Wounded.

Lisbon, Aug. 8.—Four anarchists were seriously wounded by an accidental explosion in a bomb factory. The police have adopted precautionary measures.

AGAINST INDIVIDUALS

Government May Bring Criminal Prosecutions.

RESULT OF INVESTIGATION

Prominent Men Who Have Violated the Anti-Trust Law Likely to Be Prosecuted and Sent to Prison if Convicted.

New York, Aug. 8.—A special dispatch to the New York Times from Lenox, Mass., says:

That criminal prosecutions will be undertaken in the near future as a result of the interstate commerce commission investigation of the Harriman railroad system was the information obtained here upon authority on the virtual eve of the return of Attorney General Bonaparte to Washington.

Mr. Bonaparte was asked if action, personally, against individuals would be included in the prosecutions. He replied somewhat enigmatically:

"I have noticed a good many complaints that criminal prosecutions against trust magnates and sentences of imprisonment for them have been very infrequent and, in fact, for practical purposes, unknown.

"It is perfectly true that, in my opinion at least, a better moral effect would be produced by sending a few prominent men to jail than a great deal of litigation, however successful, against the corporations they controlled.

"Some time since two corporations and their respective presidents were indicted jointly for violation of the anti-trust law. If the corporations were guilty of such it would be hard for the lay mind at least to understand how their presidents could be innocent. Nevertheless the jury convicted the corporations and acquitted their presidents.

"It is the avowed purpose of the department of justice to prosecute criminally anyone who is really responsible for violations of the anti-trust law wherever it can do so with any reasonable probability of success. It does not care to prosecute mere underlings who are known to everyone to have acted under the direct authority of their superiors. But if it can get a case against any of the superiors such as justifies a reasonable hope on the part of experienced lawyers that he can be punished personally the department will undoubtedly take advantage of the opportunity as soon as it is presented."

BEARS RAID STOCKS.

Prices on the New York Exchange Unmercifully Hammered.

New York, Aug. 8.—The bears fell upon the stock market tooth and nail during the noon hour and swept prices downwards violently, uncovering extensive selling orders on the way down and buying hastily to take profits on the short side before the end of the hour. As a consequence the slump was followed by a quick rally. The onslaught of the bears awakened up what had been a quiet stock market during the forenoon. The absence of liquidation had encouraged the idea that the weakness of the market which had been shown for two days past was over. The uncovered bears were disposed, therefore, to cover their shorts and the market showed a considerable degree of strength. The crumbling away of one or two points in the list, notably Sugar and Interborough-Metropolitan, gave warning of pressure to liquidate. The market resisted for a time, but the attack by the bears developed the vulnerable positions and efforts at support were abandoned. Enormous blocks of Union Pacific and United States Steel were thrown over, evidencing the urgency of liquidation. The general agitation against corporations was the principal topic harped on by the sellers of stocks.

BUILDING TRADES WORKMEN

Will Go Out on Strike in the City of Washington.

Washington, Aug. 8.—A general strike of the building trades workmen of this city will go into effect within a few hours as the result of the decision of the local bricklayers' union in voting to join the other building trades which have already voted for a strike. The bricklayers' organization had deferred action. The strike will affect about 700 men and will interfere with operations on the new Metropolitan club and other buildings. No government works of importance will be interfered with.

The bricklayers' organization also voted to hereafter affiliate with the American Federation of Labor.

Two Wisconsin Boys Drowned.

Beloit, Wis., Aug. 8.—Clarence Searles and Kenneth Andre, each ten years old, were drowned in Rock River by falling from an embankment.

STORM IN PENNSYLVANIA.

Floods Town and Washes Out Railroad Tracks.

Pittsburg, Aug. 8.—Thomas Jordan, the negro janitor of the First National bank of Turtle Creek, who is under arrest on a charge of disorderly conduct in connection with the disappearance of \$4,750 about a week ago, was taken before a justice of the peace for a hearing. During the proceedings a terrific thunderstorm came up and Turtle creek overflowed its banks, flooding the town.

Lawyers, bank officials, constables and detectives were forced to vacate and the hearing was suddenly terminated for the day.

The storm was one of the heaviest of the season. Many buildings about this city were struck by lightning.

At Irwin, a culvert over Tinker Run on the Young branch of the Pennsylvania railroad filled with debris and the water rushed over the road. It stripped the Atlantic Refining company plant of everything but tanks and brick walls. Tons of stuff were thrown against the roadbed of the railroad and washed away, leaving rails and ties unsupported. The mass of debris buried part of a freight train. Much damage was done at Larimer and the Irwin Trafford trolley line is tied up.

Several thousand dollars damage was done at Wilmerding, where the principal streets were inundated, cellars flooded and trolley traffic stopped.

FOUR PERSONS KILLED.

Passenger Train Hits a Carriage at a Crossing.

Allenhurst, N. J., Aug. 8.—Four employees of the Norwood House were killed when their carriage was run down by a Pennsylvania passenger train known as the "Bankers' Special" at the Corliss avenue crossing here.

They were Thomas Edwards, a driver, and Loretta Grace, Jennie McDonald and Hannah Murphy, waitresses.

The Corliss crossing is just south of the local station of the New York and Long Branch railroad and the station platform was crowded with summer visitors who witnessed the accident. Edwards had stopped his team at the crossing where an excursion train blocked the road. As the excursion train drew out Edwards started his horses and the carriage was squarely on the rails when the flyer, its approach hidden by the oppositely moving special, tore across the roadway. Horses, carriage and occupants were ground to bits.

ENDED IN AN ACCIDENT.

Auto Race Causes the Death of Two Persons.

Milwaukee, Aug. 8.—A race between two big automobiles from Milwaukee to Okauchee, a distance of about twenty-five miles, with a supper and prize of \$25 as the stakes, ended in a frightful accident to one of the cars, which resulted in the death of two of its occupants and painful though not fatal injury to two others. The machine which met with an accident collided with a bridge which spans Elm creek near Brookfield Junction, about ten miles west of Milwaukee. The wrecked car is owned by Alderman John Koerner, while Frank Mulken owns the other machine, which reached its destination in safety.

Former Alderman Joseph Kuschbrecht of Milwaukee and George Post, the chauffeur, were killed. Horace Greeley Sloan, son of a former Milwaukee judge, and Paddy Dorrell, a fight promoter, were badly but not fatally injured.

TRAGEDY ON A BUSY STREET

North Carolina Man Kills a Woman and Himself.

Asheville, N. C., Aug. 8.—Mrs. Laura Day, proprietor of a boardinghouse, was shot five times and killed by Robert Murdock, keeper of a stall in the market house, who after emptying his weapon into the woman's body, deliberately reloaded and fired into his own heart.

The tragedy occurred on a busy street and caused intense excitement. No cause has been assigned for Murdock's act further than that he had gone to the house to collect a debt he claimed the woman owed him and over which they had trouble.

THREE BATHERS PERISH.

Man and Two Women Drowned in Lake at Newton, N. J.

Newton, N. J., Aug. 8.—James Johnson, aged twenty-one, of Jersey City, Harriet Slinkard, aged sixteen, of Brooklyn, and Helen Bloomer, aged eighteen, and also of Brooklyn, guests at the Hunt home, were drowned while bathing in the lake here.

MURDER AND SUICIDE.

Michigan Laborer Kills His Wife and Himself.

Owosso, Mich., Aug. 8.—Edward Halsted, a laborer, aged thirty-six years, of Mount Pleasant, Mich., shot and killed his wife, who had started suit for divorce, and then committed suicide. He followed the woman here from Mount Pleasant.

FOUR PEOPLE KILLED

Rumored That Many Others Met Death in Iowa.

LIST OF INJURED IS LARGE

Damage to Property as a Result of the Storms Will Be Very Heavy—The Loss in Illinois Will Be Something Enormous.

St. Paul, Aug. 8.—Four dead, nine injured, property loss in Minnesota alone amounting to considerable more than \$100,000 and incalculable damage to telegraph and telephone wires and through them to business interests, form the total of the results of Tuesday's storm as summed up from the latest dispatches.

In two counties in Illinois the damage is estimated at \$1,000,000, including the laying waste of 25,000 acres of corn.

The four dead were reported from Hanlontown, Ia., where Ole Tweed, Ashland Tweed and his wife and son were killed.

The known injured are: E. Eichenhausen of Sparta, at Winona; Andrew Nelson and family, Forest City, Ia.; H. Fuller, mail clerk on train at Winona; Mrs. Harrison of Des Moines, at Clear Lake, Ia.; Mrs. Quinby of Elma, Ia., also at Clear Lake; Gladys Verry, Mason City, Ia.; Fren Gamatt, Lake Mills, Ia.

Several others were reported dead, but the report could not be confirmed and late advices from Des Moines were to the effect that those reports probably were incorrect.

Dispatches from Iowa told of a cyclone which swept across the northeastern part of Winnebago county, clearing a path twenty rods wide and fifteen miles long. In the neighborhood of Forest City eight dwellings and twenty farm buildings were destroyed, and great damage was done to stock and crops. Some summer cottages were blown to pieces, twelve barns and a Catholic church at Rockwell were destroyed and other minor damage was done besides the killing of stock.

Although information from the country districts in Minnesota where the storm struck was meager, it was plain that Winona received the brunt of the elements' force and the damage in that city was found to be much greater than at first given out.

In the blowing off the tracks of the Green Bay train between Winona and Marshall two men were hurt. These were E. Eichenhausen, a traveling man from Sparta, and Mail Clerk Fuller.

FOUR PERSONS KILLED.

Several Others Injured by Tornadoes in Iowa.

Des Moines, Ia., Aug. 8.—Final reports from the storm stricken district of Northern Iowa indicate that four persons met death in the tornadoes which wrought ruin and havoc Tuesday afternoon. The dead are all of Hanlontown. They are:

Ole Tweed, Ashland Tweed, Mrs. Ashland Tweed and son.

The seriously injured are: Mrs. Harrison of Des Moines, Mrs. Quinby of Elma, Ia.; daughter of L. O. Varney of Mason City.

The heaviest damage to farmers was in the vicinity of Rockwell, where twelve barns were destroyed and much live stock killed. The town of Clear Lake was a heavy sufferer.

Of the Hanlontown victims, Ole Tweed was killed in the field and the other family in the crash of their home.

The roof of the Roman Catholic church at Rockwell was blown off. It is reported that considerable damage was done to crops in Winnebago county and one death in the village of Jolice is rumored. The town is cut off from wire service. The report that twenty were killed is probably incorrect.

STORM IN ILLINOIS.

Damaged Property to the Extent of a Million Dollars.

Peoria, Ill., Aug. 8.—The storm of Tuesday night, which was accompanied by a fifty-mile an hour wind, was the worst in many years. Hailstones of the size of a hen's egg cut the blades off the cornstalks and left 25,000 acres of corn barren waste. Farm buildings were laid low and thousands of window panes succumbed to the terrific blow. Telephone wires are down all over the western part of the county and the damage in Peoria and Knox counties is estimated at \$1,000,000.

PROMINENT MAN A SUICIDE

Ends His Life While Morbid With Grief.

Pittsburg, Aug. 8.—George Wallace Delamater, once candidate for governor of Pennsylvania, and who served as state senator from Crawford county from 1887 to 1890, committed sui-

Embroidery Class

Our embroidery class will meet tomorrow as usual from 9 until 11 o'clock. All those desiring to enter the contest should be working on their pieces now as it closes Sept. 20th.

This is just the time of year to begin your Christmas work as you are given the benefit of every idle moment to apply yourself to it. Start now and you will be surprised to see how it will lighten your holiday labor.

We are proud of the work of our young ladies and desire them to meet with us every week. Do not miss a lesson.

We will greatly appreciate it if those who wish to buy new pieces will come before nine o'clock and make their selections before the class work begins.

Lawn mowers repaired at Hoffman's. 1tf

Try an ad in The Dispatch, they always bring results.

J. F. Dykeman, who has been rusticated at his farm at Dykeman for a number of days left for several points in the western part of the state. Mr. Dykeman is still working in the interests of the M. E. A. and likes the work and finds it very profitable.

The young ladies of the U O 2 B in it club and their gentlemen friends are being entertained by Harold Webb and Howard Ingersoll at Smiley and Hubert. Mrs. J. T. Sanborn is chaperoning that portion of the party at Smiley, while Mrs. M. J. Reilly is chaperoning the Hubert party.

Mr. and Mrs. T. B. Walker, Fletcher L. Walker and Archie D. Walker, of Minneapolis, arrived in the city yesterday in two large touring automobiles. They are on their way to Akeley and left for there this morning. They expect to remain there a few days and then return to the mill city.

A demurrer in the case of the O'Brien Mercantile Co. vs. Crow Wing county, was argued before Judge McClenahan today. The case was one growing out of the failure of Grant Tyrrell, contractor on ditch No. 10. Tyrrell assigned his contract to the O'Brien Mercantile Co., but as there have been labor leins filed the county refuses to pay the amount due to the assignee of the claim.

Wood For Sale

Wood & Polk sell dry edging 4 foot length—full cords \$3.00 at mill. We will deliver the wood for cost of delivery extra, 50c to \$1.00. Leave orders with driver or phone 43 or 161 or \$50. Drivers will receive the pay. 47t12

FAD OF PITTSBURG WOMEN.

Having Their Vermiform Appendixes Removed Because of Social Vogue.

That Pittsburg society women have developed a morbid fad in having their vermiform appendixes removed and that the amputation has become so much of a vogue as to have become a requisite to enjoy social equality with the upper set is the startling announcement made the other night after careful inquiry, says a Pittsburg special to the New York World.

Time hangs too heavily upon the hands of these women. Tiring of the social whirl and the painful monotony and lack of novelties in freak entertainments and social diversions, members of the gentle sex of the upper circle are now resorting to the soothing effects of anaesthetics and the sensations of the operating table. Against the advice of physicians and with professional assurance that the appendixes are in good order and acting intelligently and with precision, many women insist upon having the pesky things removed.

A prominent Pittsburg surgeon says: "I occasionally run across cranks in operating upon women. It becomes a mania with them to be operated upon. I have one woman in mind. If I should tell you who her husband is you would wonder that she did not have better sense. She not only insisted that her vermiform appendix be removed without cause, but every other organ she could possibly spare. She is now in New York seeking another operation. Her husband's name would startle you."

AN ALLY TO CUPID.

Expressman Makes Specialty of Handling Baggage For Elopers.

A bewhiskered Cupid in the guise of an expressman has opened headquarters at 4444 Easton avenue, a fashionable section of St. Louis. Over his door is the legend:

"Runaway Couples' Friend."
 Charles Cornelius is the Cupid, and he is willing to help all elopers who apply for aid, says a St. Louis dispatch.

"It's a difficult thing to steal away and get married," he said, "unless the expressman is on to his job and carries off the baggage quietly."

He told of an experience in which he was caught. He stumbled on the stairs and woke the family up.

"I managed to make away with the trunk all right," he said, "but after waiting at the Union station for an hour the young man in the case came to me with a long face and said the game was up. He said the girl had been captured and locked in her room."

"I was afraid to take the trunk back and face the father, but in a few days he came in and said he had reconsidered. He told me to check the trunk for Denver, along with several others, as the entire family was going to 'run away' to see the daughter get married."

SEA GULLS THAT TALK.

Have Language of Their Own Which Men Can Imitate, Says Dr. Watson.

Dr. John B. Watson, professor of psychology in the University of Chicago, returned recently from a remarkable trip of research in the Dry Tortugas islands, off the coast of lower Florida, says a Chicago dispatch. His work was carried on at the Andrew Carnegie station.

Professor Watson declares that the sea gulls on the islands have a language of their own which can be imitated by a human being and live in "family groups" in especially built nest houses; that they really think when in quest of food and give unusual evidence of reasoning power.

He believes the birds have politics in their governmental affairs, but that the factional squabbles which arise among leaders are not permitted to interfere with the government. Everything is conducted in an orderly way.

Older birds educate their young to fly and hunt food by a system, he asserts.

New disturbances have broken out at Alcazar, in the Fez region. The French residents of that locality will be instructed to go to Tangier.

BIG LOSS TO HUNTERS

Missouri Game Preserve Being Changed Into Farm Land.

"CHAIN OF LAKES" DOOMED.

Had Been a Sportsman's Paradise Since 1833—Dredges Are Draining the Waterways, While Giant Trees Are Being Felled and Duck Harbors Leveled Up.

Big steam dredges and half a dozen growling sawmills are toiling by night and by day at the desecratory task of removing from the face of the earth the last real "happy hunting ground" in northern Missouri, writes a New Cambria (Mo.) correspondent of the Kansas City Star. Amlid a canopy of tarlike smoke from engine stacks canals are being dug to drain the water from the lakes, giant trees are being felled and sawed up for wagon timbers, mine props and railroad ties, and all the duck harbors are being leveled up. Within two years from now the once magnificent preserves known as the "Chain of Lakes" will be a vast stretch of corn and wheat and oats, with not even a stump as a landmark where the huntsman had trod.

Up until the early part of the present year the "Chain of Lakes" was as wild and picturesque as on the day, in the year 1833, when the Foxes and Sacs shook the dust of Missouri from their moccasins and began their westward trek. Clear up to the beginning of this century evidences of Indian occupancy were found. Across the river was a massive stone dam, wide and solid. In the mounds on either side the bank one could pick up arrowheads and flint chips by the basketful, with here and there a curious double edged ax with grooves for the split handle. Some old hunters say they found one mound full of bones, where legend had it that the Foxes and Sacs fought over a great pot of gold given the former tribesmen for valuable services to the government. There is evidently a basis of some sort for the story, because as late as 1890 people living near the river met and talked with Indians who had made the long journey from their far western reservation to verify the data given them by their sires. They were seen digging at places along the river, but if they located the treasure they never told.

Some years ago the "Chain of Lakes," clothed in all the majesty of its primeval grandeur, fell into the hands of Oswald Hicks, a prominent real estate man of Macon. Mr. Hicks, when a boy, had shouldered his father's old blunderbuss and, with a faithful dog at his heels, set out in quest of game. But on every enticing wood he met this discouraging legend:

Warning!
 No Hunting Allowed
 Under Penalty
 of
 THE LAW!

The last two words were always in capitals and carried with them the suggestion of stone dungeons and iron bars. So he resolved when he grew up if he could not be president he would do something for his country anyhow. When he bought the 600 acres comprising the "Chain of Lakes," the owner was glad to let it go cheap, because it was nothing but a jungle and no good for farming. But it was at that period the finest duck hunting ground in the state and abounded with squirrels, rabbits, coons, possums and foxes.

On receiving his deed Mr. Hicks made the public announcement that the "Chain of Lakes" was open to the hunters of the world. At numerous places on the edges of the estate in substitution for the less inviting signs was the hospitable placard:

You Can Shoot Anything
 on This Land
 But the Warden.

The bars thus let down, the fame of the "Chain of Lakes" soon spread abroad. Hunting parties visited it regularly from Kansas City, St. Joseph, Moberly and other cities of the state, and they always found game a-plenty to pay them for their trip. They marveled that such a fine hunting place should exist in the heart of an agricultural section so densely populated.

In their migrations during the spring and fall the "Chain of Lakes" proved a fatal way station for countless coveys of pintails, mallards, teal and blackjacks. It was no uncommon thing for a hunter to come out of the "wilderness" with a hundred slain voyagers of the air. In one fair season the Macon hunters alone bagged 500. The yarns in the histories of the old pioneer and his flintlock were thrown into the shade by the work of the fusileers of the twentieth century. The lakes were alive with fish.

But it couldn't last. Year by year the price of bottom land steadily advanced, and the pressure became too great for the owner of the "sportsman's paradise," and he at last, with much reluctance, let go. He said he never made a deal in his life that he hated worse, and it didn't make him feel any better when he learned that the purchaser had soon turned the land over for a great deal more than he paid for it. But Mr. Hicks is a business man, and he appreciates the practical force of commercial necessity. The "Chain of Lakes" under the conditions confronting it will put thousands of dollars into the hands of industrious workmen, and every year it will bring rich offerings to the great storehouse of the commonwealth.

CLEARANCE SALE

THE main features for the balance of this week, will be in our shoe department.

Our entire stock of men's, ladies', misses' and children's shoes go at cost, this week only all new and sightly goods.

We offer a lot of misses and children's slippers, black and tan, button and lace, sizes from 6 1-2 to 2, which formerly sold at from \$1.00 to \$1.50 per pair, your choice this week 73c a pair. MINNESOTA
STATE FAIR
Forty-Eighth Annual Display
of Minnesota Products Open
September Second
EVERY DEPARTMENT ENLARGED

Dan Patch to be Opening Day
Attraction—A Big Airship
Daily Attraction

With many new buildings, great changes on the grounds, wonderful improvements in lighting and sanitation, and a large area added to its exhibition space, the Minnesota State Fair will this year be indeed "the greatest fair in America."

The fair is to open Monday, Sept. 2, (Labor Day) and continue through the week, closing on Saturday, Sept. 7. Unusual efforts have been put forth on the part of the managers to make the fair a great one and even at this early date very largely increased exhibits are assured in all divisions of the fair.

The opening of the mammoth Livestock Amphitheatre last year attracted the attention of stockmen all over the country and they are coming in great numbers this year to show their animals in the best equipped stock division of any fair in the country.

The new Dairy Building is an adequate structure to represent the enormous dairy interests of the state. Near it is the new Poultry Hall. The Grand Stand has been rebuilt and made perfectly safe and new bleachers accommodating 5,000 more people have been erected.

At night the grounds and building will blaze with electric light and races under a lights and wonderful pyrotechnics in connection with "The Siege of Jericho" spectacle will furnish a magnificent entertainment.

A mammoth air ship will sail about the grounds daily and visit each city in turn. The races will be of the finest and will be "pulled off" amid absolutely clean surroundings.

Dan Patch will appear again on Monday in an endeavor to break his record made last year at the Minnesota fair, when he reduced the world's record for a harness horse to 1:55. On Thursday, Sweet Marie, the champion trotting mare will go against her record of 2:02. Saturday will be automobile day. A hundred other great amusement features will fill up the programs and there will be something doing every hour of each of the six days.

The fair grounds are located midway between St. Paul and Minneapolis.

Endorsed By the County

"The most popular remedy in Otsego County, and the best friend of my family," writes Wm. M. Dietz, editor and publisher of the Otsego Journal, Gilbertsville, N. Y., "is Dr. King's New Discovery. It has proved to be an infallible cure for coughs and colds, making short work of the worst of them. We always keep a bottle in the house. I believe it to be the most valuable prescription known for Lung and Throat diseases." Guaranteed to never disappoint the taker, by H. P. Dunn & Co's Drug Store. Price 50c and \$1.00. Trial bottle free.

WENT TO TENSTRIKE

Members of the State Warehouse and
Railway Commission Went
There Wednesday

Members of the Minnesota Warehouse and Railroad Commission went to Ten Strike yesterday on business. General Manager Gemmel came down from the north with his private car and met them and took them to Ten Strike. He went north from there with his car today.

FILLING BAD SWAMP

Minnesota & International Engaged
in Filling Seemingly Bottom-
less Swamp

The Minnesota & International is again endeavoring to fill a bad piece of swamp north of Walker. It is only a short place which has heretofore been bridged, but it has so far proved baffling. Last year the company put many hundreds of car loads of dirt into the hole endeavoring to fill it but were compelled to abandon the attempt temporarily, but commenced again the first of August and are now putting in about 160 car loads daily and have hopes of succeeding in getting a solid road bed. Owing to the fact that the settling of the dirt throws the bridge and track out of line the work is causing trains to be late nearly every day.

"Everybody Should Know"

says C. G. Hays, a prominent business man, of Bluff, Mo., that Bucklen's Arnica Salve is the quickest and surest healing salve ever applied to a sore, burn or wound, or to a case of piles. I've used it and know what I'm talking about." Guaranteed by H. P. Dunn & Co. druggist, 25c. ttdsw

Three grades of cedar shingles at whole or retail. If you are going to build call and inspect our stock. 36tfwtw

Benefits of a King's Favor.

A number of years ago his majesty of Siam gave an Italian (for painting one of his wives from a photograph) the grand cross of the Siamese crown. It is a rather large order. "This cross," said his majesty graciously, "will entitle you to marry twelve wives. It is a distinction I seldom confer, so I hope you will make good use of it."—Siam Observer.

The Limit of Life

The most eminent medical scientists are unanimous in the conclusion that the generally accepted limitation of human life is many years below the attainment possible with the advanced knowledge of which the race is now possessed. The critical period, that determines its duration, seems to be between 50 and 60; the proper care of the body during this decade cannot be too strongly urged; carelessness then being fatal to longevity. Nature's best helper after 50 is Electric Bitters, the scientific tonic medicine that revitalizes every other organ of the body. Guaranteed by H. P. Dunn & Co., druggists, 50c. ttsw

TO BURN COAL
IN TWO BUILDINGS

Board of Education Decides to
use Coal as Fuel in Wash-
ington and Lincoln Schools

LITTLE OTHER BUSINESS DONE

Report of Treasurer and of Sink-
ing Fund Were Accepted by
Board of Education

Outside of the fuel question and the allowing of a few bills there was nothing doing at Board of Education meeting Monday night. In the matter of fuel it was decided to change the grates in the steam heating plants in the Washington and Lincoln buildings so as to use coal and the purchasing committee was authorized to purchase fuel for these buildings.

The treasurer presented his quarterly report which was accepted as follows:

Are Diseases Increasing?

There can be no question that the prevalence of certain diseases has increased during the last half century. Conspicuous among these are diabetes and insomnia, both of which are largely due to the mental stress of a harder struggle for existence. The increased consumption of alcohol and the free use of narcotics are also responsible for many morbid conditions unknown to our hardier forebears. But, in comparing the present prevalence of diseases with that of the past, there are several factors for which due allowance is often not made. One of these is that our forefathers died, as a rule, at a considerable younger age than their descendants; if they did not perish by the sword they were mowed down from time to time by the plague and other devastating epidemics. In this way they escaped many of the diseases, not only of old age, but of advanced middle life. Again, it must not be forgotten that each generation represented to a much larger extent than is now the case the survival of the fittest. Most of the weaklings died in childhood. The triumphs of modern hygiene is that it has preserved a large proportion of these lives.—Practitioner.

Autographs and Holographs.

"An autograph," said an antiquary, "is worth nothing, while a holograph may be worth \$1,000 or more. An autograph of a man is his simple signature. His holograph is one of his signed letters, and its value depends on its interest. Some men are such fools that they think autographs valuable and holographs worthless. I know a man who found in his grandfather's chest a lot of important letters of Franklin, Washington, Aaron Burr, Hamilton, Andre and Jefferson. He read these letters; then he burned them, first cutting out the signatures. For the signatures he got 50 cents apiece or thereabouts. For the letters in their entirety he would have got from \$100 to \$500 apiece. By this loss of about \$24,000 the man learned the difference between an autograph and a holograph."—New Orleans Times-Democrat.

FOLLOW COMMISSION RULES

County and Town Overseers Will
Work in Accordance With Instruc-
tions of Commission

L. E. Garrison, the county road overseer, recently appointed by the county commissioners states that in accordance with the decision of the commissioners, all work hereafter done on the high ways of Crow Wing county will be done in accordance with the instructions of the state highway commission. Mr. Garrison states that there have been but few appointments of town overseers reported and he is anxious that the town clerks should report at once.

MARINE BALLS LATEST FAD.

Summer Girls Divide Bathing Hours
With Favored Admirers.

One of the merriest frolics the prolific brain of a flirtatious summer maiden could devise is upon Asbury Park, N. J., says the Philadelphia Inquirer. A delicious subtle danger threatens mere man, and, though warned of his danger, yet he will walk gladly into the undertow.

From time immemorial the ballroom has been the hunting ground of the bewitching Miss Petticoats, and a heavy mortality list is shown by her well filled dance programme. Yet despite feminine charms men are not partial to summer ballrooms, and while dancing with another maudlin beauty a few evenings since a pretty maid in a local hostelry conceived the "marine ball"—the division of her bathing hours among favored male admirers, record being kept upon a card similar to her order of dance.

There is a suggestion of French fastidiousness about the idea. Perhaps it had its origin at the French watering places, but the American girl can be depended upon to round out the idea with characteristic vigor and originality.

The idea is not general property yet by any means, although it promises to become immensely popular. At the hotel enlivened by the graceful presence of the dainty damsel who first voiced the diversion the following conversation was overheard recently:

"Oh, Mame, who have you given your bath to this morning?"

Fresh and pliant in her morning gown of figured lawn, Mame glances back from beneath her sunshade and replies:

"I forgot. I must look at my book. Oh, yes, Charley Spooner!"

"I have him tomorrow. He isn't much of a swimmer, but he's awfully athletic looking, and his bank roll is as big as his muscle."

"Well, you just watch me capture that six foot life guard at Seventh avenue. I'm going to make him come out after me tomorrow."

High tide and low tide baths are the most popular, some of the lovely creatures being forced to make the gentlemen draw lots for ten minute sections of them.

The high tide requires strong and capable partners, but as there are desirable men who are not athletic the maidens consult the bathing hour card in making dates. The muscleless but moneyed ones are reserved for a sand promenade or a waist deep dip, ending with an "honest" plunge. The more athletic partners are reserved for an out to sea swim and a frolic on the diving raft.

He—So they got married and went off in their new motor car. She—And where did they spend their honeymoon? He—In the hospital.

A DAY SCENE IN THE TYROLEAN ALPS
Red Men's Carnival Tonight

CARNIVAL DID
GOOD BUSINESS

Despite the Threatening Weather
the Various Shows Were
Well Crowded

TIME OF FREE ATTRACTIONS

In Response to Inquiries the Dis-
patch Publishes the Hours of
Free Attractions

The weather was not favorable to the carnival last night, but nevertheless there was a good crowd in attendance. The shows were all well patronized and everyone seemed to enjoy themselves thoroughly. There has been considerable inquiry as to the hours of the various free attractions and THE DISPATCH today gives the official program therefore.

AFTERNOON

- 2:00 Slack wire performance.
- 2:30 Performance on the revolving ladder.
- 3:00 Double trapeze work.
- 4:00 Diving pony.
- 5:00 Leaping the gap on the bicycle.

EVENING

- 8:00 Diving pony.
- 8:30 Slack wire performance.
- 9:00 Revolving ladder.
- 9:30 Trapeze work.
- 10:30 Leaping the gap.

The performances last night were uniformly good and comparison between them would be unfair. Those who have not taken them all in will doubtless do so in the three nights remaining of the carnival. If they do not they will make a mistake.

"Regular as the Sun"

is an expression as old as the race. No doubt the rising and setting of the sun is the most regular performance in the universe, unless it is the action of the liver and bowels when regulated with Dr. King's New Life Pills. Guaranteed by H. P. Dunn & Co., druggist, 25c. ttdsw

The Automobile Ambition.

Pittsburg clubwomen are in some excitement over the discovery that in that city many women are mortgaging their homes to buy automobiles, says the Philadelphia Press. This is done to make an appearance of wealth and social position, which to many women seem about all there is of life, even if they are mere imitations. Pittsburg is not the only place where this ambition is conspicuous, and everywhere there are people who would rather have an automobile than an unnumbered home. When the clubwomen have reformed this sort of thing out of Pittsburg—for, of course, they are going to do it—we request that they send on their recipe.

Jersey Lightning Bug to the Rescue.

Caleb Hatch of Riverside, N. J., was out late recently with his bicycle with no lamp. Caleb himself tells this. Not caring to risk riding through town without a light on his wheel, he picked up a half pint whisky bottle he found by the wayside and put a dozen or more fireflies in it, says a Riverside special to the New York Times. This he placed in front of his machine. The flashing of the "lightning bugs" as they moved about answered his purpose and saved him from arrest, the local policemen appearing to be satisfied when Hatch rode by with his wheel "all lit up."

Fish to Fight Mosquitoes.

Italy is introducing in its waters an Australian fish that devours mosquito germs. Fish with this appetite exist in America; but, says the St. Louis Globe-Democrat, the mosquito keeps many laps ahead.

Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous lining of the Eustachian Tube. We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

LABOR SUPPLY MOVE

Uncle Sam Starts Biggest Employment Bureau to Help Out.

NO EXCUSE FOR IDLENESS.

Terence V. Powderly, Former Head of Knights of Labor, Has Charge of New Office—Demand For Workers Exceeds Supply—Single Men Preferred in Georgia.

The greatest employment bureau in the world is what the new information bureau of the immigration service is suddenly becoming, writes a Washington correspondent of the New York Globe. Terence V. Powderly, once head of the Knights of Labor, is in charge of the bureau, and after opening correspondence with the responsible officers of all the states concerning the actual conditions with reference to need for labor and opportunity for employment this is what he says:

"No man in this country able and willing to work has any excuse for idleness. There is demand from practically every state for labor, both skilled and unskilled. The governors or other officials are calling on us to send them men and women who want work and giving assurances that the work will be provided. The factories and farms, the mines and mills, all join in the chorus of demand, while from everywhere comes the soprano note of insistence that more domestic servants be provided."

Commissioner of Labor Sargent some time ago got in mind that it would be a good thing to learn the actual facts about the reported demand for labor. It seemed phenomenal that with the unprecedented immigration there should be an ever increasing demand for workers. Moreover, he wanted to learn everything possible about the proper distribution of immigrants, so that newcomers should be placed where they were wanted and would find work and people who had

work to do would find people to do it. Mr. Sargent has found out what he wanted to know. He has learned that workers are wanted everywhere. No community is willing to lose any of the desirable immigrants. Every community seems to want more than it gets.

Mr. Powderly was given charge of this inquiry as chief of the information work. He sent out circulars to all governors, asking specific questions about labor conditions, the demand for workers, the sort of work to be done, wages, conditions of employment, etc. Especially he wanted to know about opportunities for getting cheap land and whether the states offered any sort of inducements to immigrants.

The replies seem to leave no doubt of the genuineness of the demand for more people. First comes the call for farm laborers. New York tells of the number of farms there for sale or rent because of the shortage of people to run them. Massachusetts has a like plaint, re-enforced by the statistics that Massachusetts loves. New Hampshire seconds the motion. Especially does New England want domestic servants. Not more than half the states have yet sent in their answers, but they represent all sections and are in the same vein. "Send all kinds of workmen," writes Oregon. "Married or single are all wanted; no difference in the demand."

New York, despite that it shows a fine list of farm opportunities for people who want to buy or lease, doesn't want laborers for the cities and does not need mechanics. Rather the department of labor at Albany sends word that the state has 40,000 building trades mechanics unemployed and that there is no scarcity in any direction save on the farms. New York, of course, is extremely handy to the supply of labor that comes on the immigrant ships. It is getting as many of these as it feels able to assimilate.

But the south wants farm and plantation workers and mechanics for its short handed mills. The demand is the same from all the southern states that have reported. Louisiana sent one of the most insistent demands, including the offer of free homes and fuel to good workers. Wages are from 75 cents to \$1.50 for plantation

hands, with free homes and commonly with free fuel; mill hands can get from \$1.50 to \$4 per day, according to skill and the trade. Allens with small amounts of money will also find it possible to secure lands for homes at the lowest prices and on their own terms.

Georgia wants all the people she can get who will work. Single men are preferred there. The cities and the industrial centers, especially in the fast developing iron trade, want more people than are to be had. Farm laborers are in like demand. Utah asks for "both single and married men," and New Mexico needs labor for railroad and mining. Minnesota promises work for thousands, both on the farms and in the cities.

There is vigorous intimation that organized labor does not like this propaganda in favor of foreign labor, and threats have been muttered of making it a political issue in 1908. The labor organization people insist that there are still many unemployed people in the United States and that the government would better devote itself to getting idle people into relations with jobs rather than to inducing more immigration.

TELEGRAPHIC BREVITIES.

The Wisconsin railroad rate commission has reduced charges on live stock from many points to Milwaukee.

Mrs. Louisa M. Taft, the aged mother of Secretary Taft, who has been ill for nearly three weeks at Milbury, Mass., has suffered a slight relapse.

Lord Louis Armitage Rivers of Durham, Eng., and Mrs. Laura B. Glenn, daughter of Isaac Arbuckle, the coffee magnate, were married at Cleveland Wednesday night.

William L. Qualey, manager of the St. Paul Marble and Granite works, accidentally shot himself in the abdomen while cleaning a revolver. He died at the city hospital an hour later.

The fight between Joe Gans and Jimmy Burns, who were to fight in Los Angeles on Aug. 16, has been indefinitely postponed owing to the fact that Burns is physically unfit to participate.

With simple ceremony the ground for the new Catholic pro-cathedral in Minneapolis was broken Wednesday evening. Archbishop Ireland digging the first shovelful of dirt in the presence of 5,000 people.

Arrests by the President.

De Irujo was appointed minister to this country from Spain in 1796 and was recalled in 1807. The recall of De Irujo was marked by an unusual circumstance. At the request of the Spanish government, actuated by a desire to avoid scandal, the state department had arranged that Irujo should depart quietly, as though his recall had not been demanded; but, being a surly specimen of his race, he lingered on and on, becoming more and more a thorn in the side of the administration. To hint he was dumb, and when ordered away defiantly replied that he would suit his own pleasure in going, a course of action which resulted in the enactment of a statute empowering the president to arrest and convey out of the United States any envoy who remained after his recall and reasonable notice to leave.—Aubrey Lanston in Bohemian.

IRON ORE SHIPMENTS

Now Greater Than Before the Strike on the Ranges.

NEARLY ALL MINES WORKING

Only One Shaft in the Hibbing District Is Idle—Eastern Railroad Men Meet and Seek a Readjustment of Wage Schedules.

Duluth, Aug. 8.—The mines tapped by the Great Northern on the Mesaba range are now mining more ore than they were before the strike. The Great Northern is also carrying more ore to the docks than it did before the miners went out.

In the twenty-four hours ending at midnight Wednesday night the Great Northern shipped from the Kelly Lake yards near Hibbing 32 trainloads of 70 steel cars each, whereas before the strike the average daily shipments of ore was 25 trains of 60 cars each.

The Duluth, Missabe and Northern on Wednesday shipped 30 trains of 48 cars each and all the mines in the Hibbing district tapped by this road are now working with the exception of the Winnifred, a shaft mine belonging to the United States Steel corporation. About 95 per cent of the customary amount of ore is now being sent down from both the Mesaba and Vermillion ranges.

RAILROAD MEN IN SESSION

Desire a Readjustment of Their Wage Schedules.

New York, Aug. 8.—The Times says representatives of upward of 41,000 organized railroad workers employed on the great railroads of the eastern half of the country have been in secret session for ten days or more at Cambridge Springs, Pa., discussing various plans for obtaining a readjustment of the wage schedules under which they have been working.

Those represented at the meetings at various times have been the conductors, firemen, brakemen, yardmen, switchmen and telegraphers. The Brotherhood of Locomotive Engineers was not present.

The roads involved in the present agitation are the Pennsylvania, the New York Central and allied lines, the New York, New Haven and Hartford, the Central Railroad of New Jersey, the Lake Erie and Western, the Buffalo, Rochester and Pittsburgh, the Delaware and Hudson, the Baltimore and Ohio, the Boston and Albany and the Chesapeake and Ohio.

Many of the grievances are local and it is believed are capable of easy adjustment. Strike talk or radical measures of any sort have been farthest from the thoughts of the trainmen in all the organizations represented. It was said on behalf of the firemen's brotherhood by a brotherhood official that many of the firemen had not obtained any increase in wages as the result of the conferences held here last year.

The grievances of the conductors are that many of them are still compelled to work twelve hours a day, when a ten-hour day was promised. The switchman and other railroad workers declare that a substantial increase ought to be granted to them in view of the great increase in the cost of living.

TELEGRAPHERS ON STRIKE

Desire Reinstatement of a Discharged Operator.

Los Angeles, Cal., Aug. 8.—Following the refusal of Western Union telegraph officials to reinstate a discharged operator nearly seventy members of Los Angeles local, Commercial Telegraphers' Union of America, walked out at 5:30 Wednesday afternoon. At 6:30 there were five men working at the keys and a block away over fifty operators were meeting to decide upon future action. According to an unofficial statement by the striking employees there is absolutely no prospect of the men resuming work for at least another day and even their return is said to be more than problematical. The men declare their intention to make the reinstatement of the discharged operator the issue.

District Superintendent F. H. Lamb half an hour after the men had walked out said:

"The men walked out without previous notice. That is all I care to say at present. I have had no requests for negotiations and I cannot assume any connection between anything that has happened and the walkout of the men."

MOYER IN DENVER.

Delayed His Homecoming to Avoid a Demonstration.

Denver, Aug. 8.—Charles H. Moyer, president of the Western Federation of Miners, has arrived here. Mr. Moyer was accompanied by Mrs. Moyer and her sister and went immediately to his home. The reason for his delayed homecoming is that he desired to have no demonstration of any kind. Owing to the strain to which he and Mrs. Moyer have been subjected they have kept closely at home, denying themselves to everybody.

Grant's Old Partner Dead.

St. Louis, Aug. 8.—Thomas Morrison, at one time a partner with General U. S. Grant in peddling firewood in St. Louis, died Wednesday, aged eighty-three years.

RACE IS VERY CLOSE.

Outcome of Williams-Vardaman Contest Awaited With Interest.

Jackson, Miss., Aug. 8.—The Democratic state executive committee will meet here to canvass the returns of the recent primary election for United States senator and state offices. So close is the race in the senatorial contest that there are all sorts of conjectures as to what the count will show. The committee will meet in the senate chamber and representatives of both senatorial candidates will be on hand, as well as those of the gubernatorial candidates who are conceded the highest vote.

There have been many rumors of destroyed ballots and lost ballot boxes but when traced down these reports have been found to be without foundation. It was said that ballot boxes in Copiah, a county that gave Governor James K. Vardaman a majority of 251 over Congressman John Sharp Williams in the senatorial contest, had been burned, but the secretary of the county commission has certified that the boxes are intact.

STRIKE MAY SPREAD.

Every Railroad in the West Is Threatened.

Denver, Aug. 8.—It is not expected that Martin A. Knapp, chairman of the interstate commerce commission, and Charles P. Neill, commissioner of labor, will come to Denver in connection with the strike situation on the Colorado and Southern railroad. So far no progress toward settlement has been made.

Grievance committees of the Denver and Rio Grande and other roads are in the city and they will make a demand for an additional 2 cents an hour for yardmen. If this is done it will either end the present strike or cause it to spread to other roads. Every railroad in the West is threatened.

Sixteen of the larger mines near Trinidad depending directly on the Colorado and Southern for handling their product have closed down indefinitely. This throws some 3,000 men out of employment.

CAPTURED IN EL PASO.

Eleven Chinamen Who Had Crossed the Rio Grande.

El Paso, Tex., Aug. 8.—Eleven Chinamen who had crossed the Rio Grande four miles east of El Paso were captured in the rear of an El Paso street Chinese restaurant. In company with the Chinese were Mar Chew, the proprietor of the restaurant, one of the wealthiest Chinamen in the Southwest, and a man known as the "Jew Kid."

The immigration officers say these had met the Chinamen and brought them to the city in a hack. A railroad watchman is also implicated, a box car filled with bedding and provisions for the Chinamen being ready for their reception. Thirteen other Chinamen caught here are under sentence of deportation. Seven Japanese who swam the Rio Grande at Bonquillas, 200 miles east of here, have been brought here and lodged in jail.

DENIED BY ARCHBOLD.

Charge of Washington Official Against the Standard.

New York, Aug. 8.—Answering the charge made at Washington by an officer of the bureau of corporations that in every step by the bureau in its investigation of the Standard Oil company it had met deception in man and deception in methods, Mr. John D. Archbold said that there had been no such conference with Standard Oil officials, as so represented; and that no misleading or deceptive statement had been made by the company in connection with the governmental investigation.

"Every word of my statement was the exact truth," said Mr. Archbold. "If as much could be said of the comment of the alleged official, I do not think he should have allowed any consideration to restrain him from permitting his name to be given."

PRESENCE OF TROOPS.

Has a Most Excellent Effect on Business at Belfast.

Belfast, Aug. 8.—The first day of the military policy of Belfast passed in absolute quiet. There was no incident of any kind and the effect of the presence of the troops on the business of the city was most excellent. Some of the mills and factories that had closed were reopened, and others announce that they soon will reopen. More goods have been moved from the docks than on any day since the dockers' strike began and it is apparent that the strike of the carters will collapse speedily.

The troops were withdrawn from the streets at 5 o'clock in the afternoon. During the evening commercial men commented favorably upon the great change for the better in the situation and they anticipated an early return to normal conditions.

CHARGED WITH MURDER.

Former Policeman Accused of Killing an Editor.

Helena, Ark., Aug. 8.—Former Policeman Ben Curruth has been arrested and charged with the murder of J. M. Scott, city editor of the Helena World, Sunday morning. Curruth denies the charge but the police claim to have strong circumstantial evidence against him. Curruth was a member of the police at the time the entire force was compelled to resign upon the demand of the citizens' mass meeting following charges of graft by the World.
